

### **3D-render/visualization specialist**

SeARCH is hiring a Dutch or English speaking to strengthen our team.

We are looking for a candidate to translate our architectural designs into expressive 3D images. The render specialist will work closely with the project architect to actively contribute to the development of the design; from the first conceptual sketch, to the final elaboration the design. An affinity for the work of SeARCH is therefore appreciated.

SeARCH is a dynamic and international architecture studio with a diverse portfolio. We are therefore looking for a candidate with broad experience, and an ability to contribute to a diverse range of building typologies and environments, switching with ease between urban, landscape, interior and exterior.

We are looking for someone who can work both independently and within a team, sharing ideas and information. This role will require excellent communication skills, and at least 2 to 3 years of experience in a similar role. Proficiency in the necessary software, such as Lumion, Twinmotion, & Adobe Suite in combination with SketchUp & Archicad is expected.

Our employment conditions are in line with the Dutch collective labour agreement for architectural firms.

If interested, please send your motivation letter, CV, and a concise portfolio to Harry Kurzhals at [applications@search.nl](mailto:applications@search.nl)
